Subject: FW: Ag WUE re-vision

As has been promised, please advise the Ag Caucus what part of our recommendation for changes to this table has been accepted. Note that this was submitted on August 19, 2003 -- some very small portions have found their way into the Stakholders Draft.

Anisa Divine, Ph.D., Senior Planner
Resources Planning & Management Dept.
IMPERIAL IRRIGATION DISTRICT

The following is my suggestion for presentation of irrigated acreage in the Ag Water Use Efficiency narrative – page 1, lines 29-36.

Irrigation Method	Irrigated Acreage (million acres)				% Change Total Acreage
	1990		2000		
	Acreage	% of Total	Acreage	% of Total	
gravity (furrow, border, basin)	6.5	67.7%	4.9	51.0%	-16.7%
sprinkler	2.3	24.0%	2.8	29.2%	5.2%
drip / micro	<u>0.8</u>	8.3%	<u>1.9</u>	19.8%	11.5%
Total	9.6		9.6		0%
